

Aerial Work Platforms

Aerial Work Platform - There are numerous accessories used for lift trucks that can be utilized in order to help expand the capabilities of your forklift and allow you to pick up objects, handle materials with out difficulty or to finish clean-up tasks.

A few attachments were specifically designed for the blades themselves. For example, fork extensions are used when you need much more blade length, that increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are one more variety used whenever transporting rolled material so as to ensure it does not roll off of the typical flat blades.

Examples of lifting attachments include pivoting and telescoping crane or boom attachments. They can come in quite a few different kinds and are usually utilized for transporting poles, metal bars, lumber and other kinds of bulky things. Additional attachments such as other styles of hooks and hook plates are offered in order to pick up objects using a sling or chain. Magnetic lifters and slab lifters are other items that can be used with hook accessories. Slab lifters are specialized attachments that are designed for picking up a variety of materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which attach to your lift truck to be able to make transferring rolls of carpet much easier. The attachment connects onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are many kinds of lift truck accessory meant for facility maintenance like for example snow blades. These industrial forks can be attached to front end loaders and intended for moving materials like for example dirt, and mulch as well as snow. Other popular cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the forklift forks hook onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up simple and fast.

A material spreader is one more lift truck accessory which is usually utilized at facilities. These spreaders are useful for a variety of applications such as spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting attachment are work platforms. These can be utilized by lots of various companies daily. Platforms may vary in size from 36" x 36" to up to 60" x 60". Several models may be presented and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location using the forklift. Larger platform models have additional space for staff to be able to bring tools and other essential items meant for the job. Often work platforms are constructed of steel or ploy material.
